Best Flashlight Widget App for Android With Quick Settings Tile

The Quick Settings tile is the fastest way to a flashlight on Android. But the built-in tile is basic. Here's a better option.

Why Android Quick Settings Tile is the Fastest Flashlight Access

On Android, the Quick Settings panel is the fastest way to access system-level toggles. You pull down the notification shade and see tiles for WiFi, Bluetooth, airplane mode — and flashlight. But the built-in flashlight tile is a basic on/off toggle with no extra features.

A dedicated flashlight app can add its own Quick Settings tile that does more: it can launch specific modes (LED, screen light, SOS), respect your timer settings, and offer pocket protection — all from the same familiar swipe-down gesture.

The Problem with the Built-In Android Flashlight Tile

- **On/off only** — no brightness control, no timer, no modes.
- **No screen light option** — only the rear LED.
- **No pocket protection** — can activate accidentally.
- **No SOS or strobe** — just a steady light.

What a Good Android Flashlight Widget Should Offer

- **Quick Settings tile** — appears in the notification panel, works with one tap.
- **Home screen widget** — always visible on your main screen.
- **Multiple modes** — LED torch, screen light, SOS, strobe.
- **Auto-off timer** — prevents battery drain.
- **Pocket protection** — stops accidental activation.
- **No ads, no tracking** — respects your privacy.

Our Recommendation: OneTap - Flashlight & SOS

OneTap - Flashlight & SOS for Android includes both a Quick Settings tile and a home screen widget. One tap from the notification panel or your main screen, and the light is on. Choose between LED torch, colored screen light, SOS, or strobe — all without ads or tracking.

- **Quick Settings tile** — right where you expect it.
- **Home screen widget** — instant access from the main screen.
- **LED + screen light + SOS + strobe** — all modes available.
- **Auto-off timer** — saves battery automatically.
- **Pocket protection** — no accidental activation.
- **100% offline, no ads, no tracking**.

Download OneTap for Android on Google Play. Also available on App Store for iPhone.
